## Configuring Location Share+ Contacts

Lu Parente - 2021-05-25 - in [Managing My ZOLEO Account](#)

Location Share+ allows you to share automatic location updates with up to five (5) check-in contacts on a selectable interval from every 6 minutes to 4 hours. You and your check-in contacts will be able to use the free ZOLEO app to view the most recently reported location and breadcrumb trail on a map (provided by [Mapbox Outdoors](#)). It is important to note that your check-in recipients must have the ZOLEO app installed to view your automatic location updates.

Follow the instructions below to configure your Check-In contacts to receive Location Share+ updates.

1. Login at <https://www.zoleo.com/> then select **My Account** (use the User icon located on the top right).
2. Select the **Devices & Plans** tab.
3. Your ZOLEO device(s) will appear. Expand the desired device using the drop-down next to the device name.
4. Select the **Contacts** tab and scroll down to the **Check-In and Location Share+ Contacts** section.
5. Set your Check-In contacts using the drop-downs and press the **Save All** button (at the bottom)
6. Below each of the contacts selected, a message will be displayed indicating whether or not that contact will receive Location Share+ updates.

Contacts that show **This contact will receive Location Share+ updates** already have the ZOLEO app installed and are ready to receive automatic location updates.

Contacts that show **This contact will not receive Location Share+ updates** do not have the ZOLEO app installed and will be required to download it if you would like them to receive your automatic location updates. Pressing the **Send app download link** will automatically send that contact a link to download the free ZOLEO app and your online account will update shortly after they have installed the app.

**Note:** At this time, standard check-in messages will still be sent using SMS and/or Email delivery methods. Our next release will include an update that will allow you to also send check-ins to your contacts via the ZOLEO app.
